Christian E. Dutton

(470) 658-8006 | christianedutton@gmail.com | US Citizen

Objective

To obtain an internship for summer 2026 where I can use the experience gained from my previous engineering experiences and my coursework to grow my skillset as an aspiring computer engineer.

Education

Georgia Institute of Technology | Atlanta, GA *August 2025 – Present*
Bachelor of Science in Computer Engineering, GPA 4.00 Expected Graduation, May 2028

Skills

Programming: Java (Gradle), Python, C/C++, C#, JavaScript, React, RISC-V Assembly, Matlab, SystemVerilog
Platforms: Linux (Ubuntu, Debian, RedHat), Windows, Azure Cloud
Hardware: Raspberry Pi, Arduino, FPGAs, oscilloscope, logic analyzer, ESP32
Software Tools/Technologies: Android Studio, Altera Quartus II, SolidWorks, Git, GitHub, SQLite, OAuth
Communication: Technical reports, instruction manuals, presentations (large and small audiences)

Experience

Siemens Energy | Alpharetta, Georgia *August 2024 – May 2025*
Controls Engineering Intern

- Engineered control systems for power plants using Siemens Energy T3000
- Simulated theoretical scenarios to test control logic and ensure correct behavior
- Designed user interfaces that allow operators seamless and efficient control over their plant
- Communicated with clients to develop personalized controls software to fit their preferences
- Validated software and hardware integration to ensure functionality and compliance with client specifications

Relevant Coursework

Digital Design: CMOS Logic, Gate Level Design, FPGA Programming
Circuit Analysis: Linear, First Order, and Second Order Circuits, Op-Amps, Circuit Design, Multimeters
Data Structures & Algorithms: Arrays, Linked Lists, BSTs, Sorting Algorithms, String Searching, Dijkstra's Algorithm, Graph Traversal
Signal Processing: Sampling, Fourier Transform, z-Transform, FIR/IIR Filters, Matlab
Programming HW/SW Systems: Assembly Programming in RISC-V, Using ESP32 chips, Programming in C/C++

Activities

Journey to Arduous Star *Fall 2025 - Present*
Lead Programmer
A project within the video game development club, VGDev, at Georgia Tech.

- Coordinated with other team leads to keep the project on schedule and within scope throughout the semester.
- Reviewed code and provided feedback to grow other members of the team and integrate their work with the project.
- Designed and wrote finite state machine logic for the characters within the game to function smoothly and efficiently.
- Analyzed the codebase to eliminate bugs as they were discovered, improving playability for the users.

FIRST Robotics *Spring 2023 - Present*
Volunteer
Non-profit that runs educational robotics competitions for elementary-middle school (FIRST Lego League) and high school (FIRST Robotics Competition)

- Served as a referee for numerous FIRST Lego League competitions where I had to interact with and mentor teams.
- Added to the positive environment of the tournament as a public facing volunteer.
- Assisted with FIRST Robotics competition tournaments as both field staff and an AV technician.
- Ensured the smooth operation of said tournament by being adaptable to any situations and roles.
